What is the voice over?!

Voice over is the art of delivering meaning through the human voice.

It goes beyond simply reading a script; it is a form of performance that requires clarity, intention, and emotional awareness.

Through tone, pace, and expression, the voice communicates messages effectively and shapes how they are perceived.

A voice can represent identity, It can influence audience perception.

And in many cases, it forms the first impression of a brand, a story, or a message.

Why Voice Over matters?!

Goals of practicing

trainers will be able to...

- **Improves clarity & pronunciation**
- **Enhances expression & emotion**
- **Builds consistency & confidence**

trainers will be able to...

- **Refines timing and pacing**
- **Strengthens audience engagement**
- **Provides a professional advantage**

What are the preparations before recording?

- 
- A decorative yellow scroll with a black border and a black outline. In the top right corner, there is an icon of three tools: a blue wrench, a yellow wrench, and a blue screwdriver. The scroll contains a list of five items, each preceded by a black bullet point. The text is in a bold, black, sans-serif font. A faint 'Canva' watermark is visible in the center of the scroll.
- Tongue exercises
 - Lip flexibility drills
 - Vocal warm ups
 - Pitch training
 - Discovering natural vocal range
